E-mu Systems was purchased by Yamaha in 2009 and currently, Emulator X is no longer available. In 2012, Apple Inc. released iTunes 12.4 which includes support for audio waveform visualization in the iTunes Store. Additionally, on the App Store, Apple offers the AudioKit framework which can create sound from user-defined waveform data. It can also create instruments with various effects. But, how would you do that? On a mac you can use "dd" to copy a floppy to disk. ~~~ quotient The author was initially a fan of IBM's "PC-based computer on a floppy disk that runs 80x86 software" concept. Then he 82157476af
